

Meet Our Doctor & Staff

Dr. Aditya Singh was raised in the Football Hall of Fame city of Canton, Ohio. He attended Case Western Reserve University for his Bachelor of Arts degree and then attained his Doctor of Dental Surgery degree from the Ohio State University. After graduation, Dr. Singh gained experience working in a hospital setting, where he provided care for medically compromised patients. He moved to Middletown in January of 2004.

Dr. Singh is a member of the American Dental Association (ADA), the Academy of General Dentistry (AGD), the American Academy of

Implant Dentistry, and the Connecticut State Dental Association. He has also served as President of the Middlesex County Dental Society.

To stay abreast of the latest dental technology and provide you with the advanced care you deserve, Dr. Singh goes above and beyond the amount of continuing education recommended by the state of Connecticut. The entire team at Apollonia Dental believes that with thorough consultation and diagnosis, we can help you find the most effective, affordable, and conservative dental treatment for your individual needs. You deserve a healthy and long-lasting smile!

Your Time Is Valuable!

Fitting dental appointments into your personal and professional schedules can be challenging. At Apollonia Dental, your time is valuable to us! You deserve exclusive, personal care with our doctor and staff. We know that you are busy, and we strive to run on time so you won't be kept waiting. Dr. Singh prides himself on keeping to his schedule, only deviating from it in the event of a dental emergency. Call today and discover how we're making dental visits faster, easier, and more convenient for your whole family.

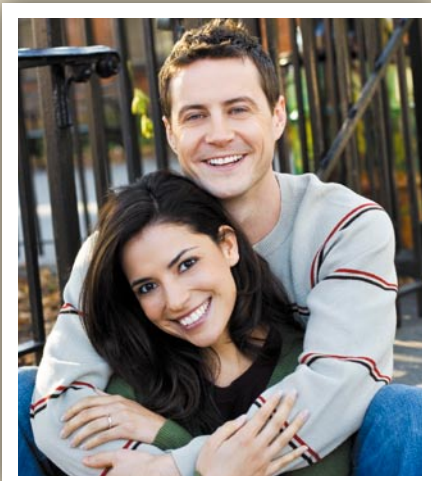

Kid Friendly & Kid Sensitive

Habits such as improper brushing and finger sucking are of primary concern to dentists, because they can seriously affect your child's smile development – in teeth, gums, bite, and even jaw growth. We understand that these habits must be treated with sensitivity and patience, and that many children feel scared or uneasy about dental visits. Our friendly and gentle manner will help your child (and you) feel at ease, so we can encourage a healthy smile for his or her future.

Quality dental care during childhood is the foundation of a lifetime of good oral health. **Ask us at your next appointment how your child could benefit from cavity-preventing sealants.**

Mouth Makeovers Are What We Do...

Changing Lives through Technology & Innovation

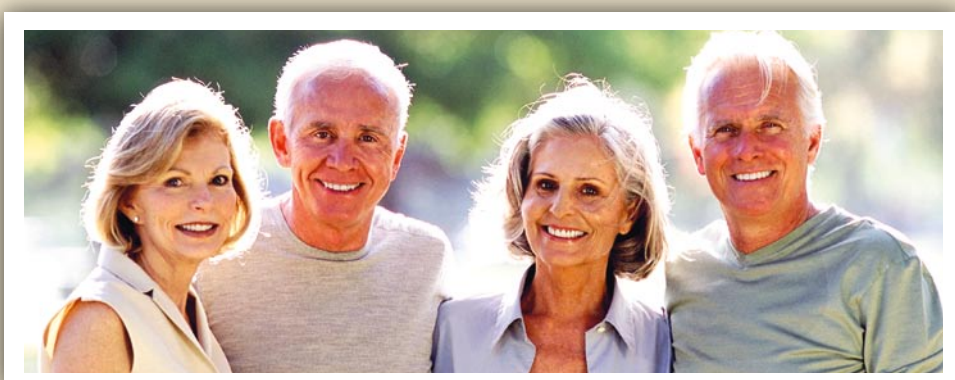

It's never too late to have a **GREAT SMILE!**

It's never too late to be able to **EAT BETTER!**

The difference can mean a **NEW LIFE!**

SIMPLE SMILE ENHANCEMENTS such as powerful, professional teeth whitening and tooth-colored fillings can invigorate any smile.

COMPLETE DENTAL IMPLANT CARE allows us to permanently replace missing teeth and restore your smile for years to come. Almost everyone is a candidate for implants, and we can perform about 90% of all implant cases right here in our office. From initial consultation to follow-up care, our practice provides the technology, facilities, and skills that you'll need to achieve a healthy and attractive smile.

Call today to schedule your **FREE** implant consultation!

Straight Teeth *in Only 6 Months!*

Many people don't pursue the straighter smile they desire because they think braces take two to three years and only use metal brackets and wires. Guess what? They don't have to! Dr. Singh provides Six Month Smiles™ Braces, which use tooth-colored brackets and thin, space-age wires to straighten your teeth in as few as 6 to 9 months.

Studies have shown that a healthy and attractive smile can boost your self-confidence and improve your personal and professional life, too. Straight teeth can also make it easier for you to keep your teeth clean, healthy, and looking fabulous!

ADVANTAGES to 6 Month Braces:

- **LOOK** - The tooth-colored brackets and thin, nickel titanium wires used by 6 Month Braces are much less noticeable than regular braces.
- **FEEL** - Regular braces can require teeth to be pulled, and often cause discomfort in the teeth and jaw. 6 Month Braces are comfortable, using low force to move your teeth without making significant changes to the structure of your bite.
- **COST** - We offer flexible financing, so you can have the smile of your dreams on a plan that fits your budget.
